Allowable Subject Matter

1. Claims 1, 3-4, 6-7 and 28-31 are pending and are allowed.
2. The following is an examiner's statement of reasons for allowance:

The closest prior art of Yeates (US 5,644,782) teaches a system having a virtual update capable read-only memory, includes a data storage system that has a read-only memory device stores primary data and an auxiliary memory device stores supplementary data reflecting updates to the primary data.

In regarding to independent claim 1, Yeates taken either individually or in combination with other prior art of record fails or render obvious to teach record data on and reproduce data from an optical disc, an encryption key, and a date and time of a last update of the database are recorded, wherein the date and time of the last update are generated by the server, record modified/updated data for initial data on the database on the optical disc, and record an encrypted password which is encrypted using the encryption key on the optical disc, wherein the server determines if modification/update of the database recorded on the optical disc is needed based on the transmitted date and time, and transmits the modified/updated data to the optical disc recording/reproducing apparatus, and wherein the initial data of the database is recorded in a read only region of the optical disc prior to a first access of the server by the user computer, and the modified/updated data for the initial data of the database transmitted from the server is recorded in a recordable region of the optical disc.

In regarding to independent claim 4, Yeates taken either individually or in combination with other prior art of record fails or render obvious to teach recording an

encrypted password which is encrypted using the encryption key on the optical disc, receiving a date and time of a last update of the database recorded in a recordable region of the optical disc from the user computer, and determining whether modification/update of the database is needed based on the received date and time, wherein the date and time of the last update are generated by the server, and recording the modified/updated data in the recordable region of the optical disc.

In regarding to independent claim 28, Yeates taken either individually or in combination with other prior art of record fails or render obvious to teach distributing an optical disc having a read-only region in which a data base corresponding to a first date and time and an encryption key are recorded and a recordable region in which the first date and time is recorded, maintaining update data for the data base corresponding to a second date and time when the data base was updated on a server, transmitting the update data and the second date and time to the user computer if the second date and time is later than the first date and time, storing the update data and an encrypted password which is encrypted using the encryption key in the recordable region of the optical disc; and updating the first date and time stored in the recordable region to the second date and time, wherein the first and second dates and times are generated by the server.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
